

# NUTRICIA RESEARCH PROVIDES NUTRITIONAL SOLUTIONS to support the development of healthy gastrointestinal (GI) function

**Dietary Support**  
The combination of **prebiotic oligosaccharides mixture (scGOS/lcFOS)** with **partly fermented formula:**

**Dietary Management**  
A blend of **partially hydrolyzed whey protein**, unique fat mixture with  **$\beta$ -palmitic acid**, starch, long-chain polyunsaturated fatty acids and **prebiotic oligosaccharides mixture (scGOS/lcFOS):**

Helps **lower the incidence of infantile colic** at 4 weeks of age compared to control groups<sup>1</sup>

Persistently displays a **lower daily crying duration** over a 17-week period<sup>1</sup>

Shows **consistent stool softening effect**<sup>1</sup>

Helps **reduce crying episodes** in infants with colic<sup>2</sup>

Results **in softer stools**<sup>3,4</sup>

Helps **improve the overall symptoms** of digestive discomfort and constipation<sup>5</sup>

scGOS/lcFOS = short-chain galacto-oligosaccharides and long-chain fructo-oligosaccharides
